

Netflix Analysis Report (SQL + Excel)

1. Introduction

- Objective: Analyze Netflix dataset using SQL queries and Excel charts.
- Tools: SQL for querying, Excel for cleaning and visualization.
- Scope: Movies and TV shows, genres, release trends, and country distribution.

2. Data Cleaning (Excel)

- Removed duplicates and standardized values (e.g., “Movie” vs “TV Show”).
- Converted release dates into proper year format.
- Created pivot tables for type, genre, and country.

3. SQL Insights

Row Count: Total titles in dataset.

```
sql  
SELECT COUNT(*) FROM netflix_titles;
```

- **Movies vs TV Shows:**

```
sql  
SELECT type, COUNT(*) FROM netflix_titles GROUP BY type;
```

- **Top Genres:**

```
sql  
SELECT listed_in, COUNT(*) FROM netflix_titles
```

```
GROUP BY listed_in  
ORDER BY COUNT(*) DESC;
```

- **Yearly Trends:**

sql

```
SELECT release_year, COUNT(*)
```

```
FROM netflix_titles
```

```
GROUP BY release_year
```

```
ORDER BY release_year;
```

- **Country Distribution:**

sql

```
SELECT country, COUNT(*)
```

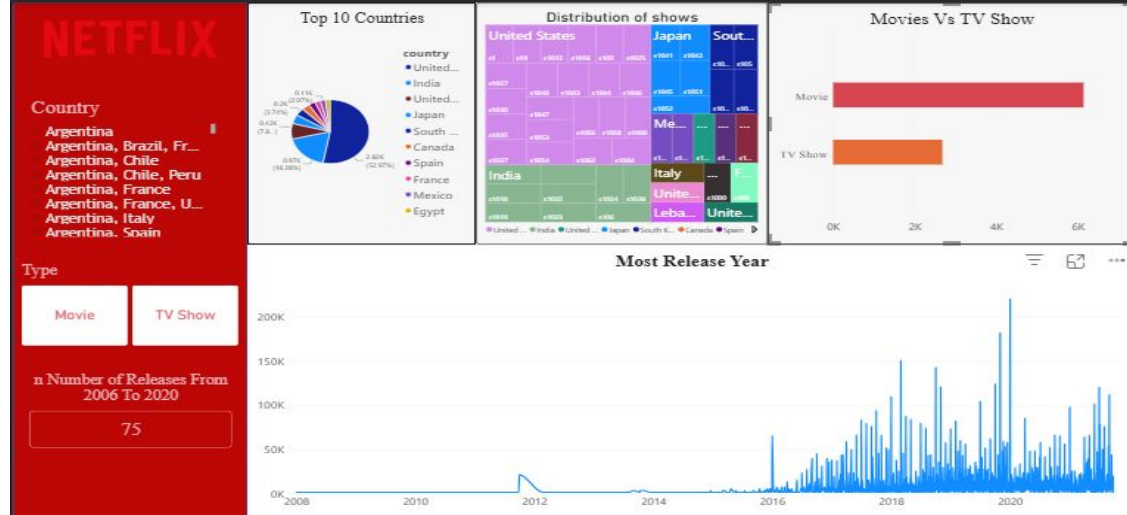

```
FROM netflix_titles
```

```
GROUP BY country
```

```
ORDER BY COUNT(*) DESC;
```

4. PowerBI Visualizations

- **Bar Chart:** Movies vs TV Shows.
- **Line Chart:** Releases per year (trend line).
- **Pie Chart:** Country distribution.
- **Treemap:** Distribution of seasons through countries..

5. Key Findings

- Netflix catalog has **more movies than TV shows**.
- **USA and India dominate** in content production.
- **Drama and Comedy** are the most frequent genres.
- Content releases have **increased sharply in recent years**.
- Certain directors/actors appear repeatedly, showing strong partnerships.

6. Conclusion

- Netflix's library is diverse but skewed toward movies.
- Regional dominance highlights target markets.
- Genre trends can guide future acquisitions.

SQL Queries

-- 1.Count total records

```
SELECT * FROM netflix_titles;
```

-- 2 Find all movies released in 2020

```
SELECT * FROM netflix_titles  
WHERE release_year = 2020;
```

-- 3.List distinct countries represented

```
SELECT distinct(country) FROM netflix_titles  
WHERE country IS NOT NULL;
```

-- 4.Top 10 directors with most titles

```
SELECT director, COUNT(*) AS total_titles  
FROM netflix_titles  
WHERE director IS NOT NULL  
GROUP BY director  
ORDER BY total_titles DESC  
LIMIT 10;
```

-- 5. Shows added in the last 5 years

```
SELECT title, date_added  
FROM netflix_titles  
WHERE YEAR(date_added) >= YEAR(CURDATE()) - 5;
```

-- 6.Count of TV Shows vs Movies

```
SELECT type, COUNT(*) AS total  
FROM netflix_titles  
GROUP BY type;
```

-- 7.Find titles with rating 'PG-13'

```
SELECT * FROM netflix_titles  
WHERE rating = 'PG-13';
```

-- 8.Longest duration movies

```
SELECT title, duration  
FROM netflix_titles  
WHERE type = 'Movie'  
ORDER BY CAST(SUBSTRING_INDEX(duration, ' ', 1) AS UNSIGNED) DESC  
LIMIT 10;
```

-- 9.Titles with multiple actors (cast contains a comma)

```
SELECT title,cast  
FROM netflix_titles  
WHERE cast LIKE '%,%';
```

-- 10.Genres with most titles

```
SELECT listed_in,COUNT(*) AS total  
FROM netflix_titles  
GROUP BY listed_in  
ORDER BY total DESC  
limit 10;
```
